Beginning

## Objective

Seeking a **UX-related internship** to apply my user experience design and research skills as well as web front-end experience.

Familiar with cooperating and communicating with back-end developers, designers and people with different backgrounds.

## Experience

### Co-founder / Taiwan Intelligent Home Corp. (Apr 2015 — )

Taipei, Taiwan

- Implement official website using **ReactJS**, **HTML**, **Scss** based on given UI design and create new page designs for additional pages that were not in the original plan.
- Write smart-home related articles for weekly column. Content includes introduction to smart home, IoT, Wi-Fi, cryptography, privacy... etc., and tutorial of connecting smart home devices.

### Software Engineer Intern / Titansoft Pte Ltd. (Jul 2016 — Aug2016)

Taipei, Taiwan

- Develop a web-based exam system with other interns, mainly responsible for **UI / UX design** and **front-end** implementation using **HTML**, **Scss**, **JavaScript** and **jQuery**.

## Education

### Rochester Institute of Technology (RIT) (Aug2018 — )

Rochester, New York, USA

Human-computer Interaction

Master of Science, Degree Candidate, 2020

### National Sun Yat-sen University (NSYSU) (Sep 2012 — Jun 2017)

Kaohsiung, Taiwan

Information Management

Bachelor of Business Administration

## Extracurricular

### Online Promoter / Grand English Drama (Nov 2013 – May 2015)

Kaohsiung, Taiwan

Design and build official websites using HTML and CSS for Grand English Drama "Kiss Me, Kate" (2014) and "Legally Blonde" (2015).

Design banner images based on materials for websites provided by director of graphic arts.

## Projects

### SafeZone (2018)

Individual Project

SafeZone contains a **mobile app prototype** built with **Adobe Experience** and a **website prototype** built with **Sketch**.

It is a service especially designed for the LGBTQ+ community, a place for people to record and deal with their emotions and share feelings with their "safe zone" — people whom they trust and feel safe with.

#### Mobile App Prototype

<https://xd.adobe.com/view/d56e8e9e-c286-45a2-438b-4adaf928dd91-a35f/>

#### Website Prototype

<https://sketch.cloud/s/MIEdQ/9PW10wx/play>

### Facebook Marketplace Redesign (2018)

Group Project

Facebook Marketplace Redesign is a semester-long group project I did with 3 teammates for a core course. We conducted **contextual inquiry**, built **personas**, and at last design Lo-fi (using **InVision Freehand**) and Hi-fi (using **Sketch**) prototypes.

Besides the parts that all team members did together, I was mainly responsible for defining symbols and integrating screens when doing hi-fi prototype and managing our GitHub repository.

## Awards

### Honorable Mention / 2nd Ziwan Cup Information Management Contest (May 2015)

Department of Information Management, NSYSU, Kaohsiung, Taiwan

Develop a web-based smart appliances scheduling system, Appliance Calendar, with 2 teammates.

### Top 20 - From IP To IPO Competition (FITI) (Sep 2014)

Science and Technology Policy Research and Information Center, Taiwan

Attend the competition as a member of Taiwan Intelligent Home (TIH) with 3 people.
